Executive Summary

Overview

Community Health Coalition (CHC) has served Durham and surrounding counties for over 30 years focusing on underserved and marginalized communities. Our collaboration with and funding from Blue Cross Blue Shield of North Carolina allowed us to continue serving and educating our communities.

Through this collaboration and funding, CHC was able to provide communities with telehealth and in-person chronic disease prevention education and screenings, provide community members with fresh produce and healthy food. We were also able to obtain an Electronic Medical Record platform (Advance MD) ensuring privacy of community members personal information.

Community Health Coalition Highlights

- Food Distribution to over **200** individuals and families (boxes, food bags and/or hot meals): **5,977**
- Blood Pressure/ Glucose screenings: **423**
- Monthly Blood Pressure and Glucose screenings at The Durham Senior Living Center and JFK Towers in Durham
- Colorectal Screenings: **200**
- Constant Contact: **4,871** contacts. Each month, members receive electronic health tips highlighting different topics from trusted healthcare professionals in our community.

Thank you to our dedicated staff , volunteers, grantors and supporters, we are still in alignment with our mission to achieve health equity for everyone and eliminate racial health disparities in Durham and surrounding areas through education and engagement.
