**Messages from the Board President, Co-Founder & Former
Director of *Community Health Coalition (CHC)***

Dear Supporters,
2020 was a challenging year!

We had changes in management and dealt with COVID19.

It was with mixed emotions that Dr. Elaine Hart-Brothers' last day as the Executive Director of Community Health Coalition, Inc. was June 27, 2020.

For 31 years she was a true warrior of her passion and CHC's mission: to address and decrease the health care disparities in Durham. Her accolades are numerous. Fortunately, she remains on as a Board member and as an "advisor".

Of course, no one could replace or fill Elaine's shoes, but we as Board members will search for a new executive director and will commit to increase our involvement with CHC and with our committees.

Year 2020 ushered in COVID-19, the pandemic. It created a challenge for CHC to expand its community outreach and education. But we forged ahead and met the challenge through virtual meetings, COVID-19 site testing, masks, medication, and food distribution to the community.

Elaine's last directives were: ***Remember 3W's - Wash your hands, Wear your masks, and Wait 6ft. apart from others! (smile)***

Sincerely,

Christy L. Clayton, MD
President
CHC Board of Directors

Christy Clayton, MD, FACOG
President, CHC Board of Directors

The Change.... Saying Good-bye to

CHC's Executive Director and Board President for 31 Years!

We at Community Health Coalition were sad to say good-bye to Dr. Hart-Brothers.

After 31 years of service, Dr. Elaine Hart-Brothers, MD, MPH, FACP, Executive Director and Co-founder of CHC stepped down as head of CHC to spend more time with her family. She, however, remains on as a board member. Her favorite saying which will be remembered is *“the more people I reach, the more lives I help save. My practice is medicine, improving the health of my people is my passion!”*

Introducing

CHC's Interim Director for six months – Dr. Darius Russell, PharmD, RPh purposely agreed to help CHC adjust during the retirement of Dr. Hart-Brothers from Executive Director and transition to a new manager who joined during the COVID-19 Pandemic!

Dr Russell brought a wealth of experience to the organization. Aside for assisting CHC with management transitions, he is owner of his family business, Russell's Pharmacy & Shoppe in Durham, NC; Director of Communications for the Durham Academy of Medicine, Dentistry and Pharmacy; and House Church Leader for his church, Triangle Church of Christ in Chapel Hill, NC.

Introducing

CHC's NEW Public Health & Operations Manager

Victoria Revelle, BA, MPH, MHFA

We at Community Health Coalition were delighted to have Victoria join our team as our Public Health and Operations Manager. In this capacity, Victoria will oversee the public health programs and the business of the organization.

Victoria Revelle, BA, MPH, MHFA is an award-winning public health professional who is dedicated to addressing health disparities and increasing health equity through designing, implementing, and evaluating local and international public health programs. Her experience includes more than 10 years of analyzing public health program operations, managing thousands of dollars in grant funding and supervising staff. As a champion for healthy living, she has implemented global health workshop programs in Paris, France; Rome Italy; Madrid, Spain and in the United States. Her public health work has been featured in print, social and broadcast media. In 2015, 2016, 2017 and 2018, Revelle received national recognition for presenting innovative and educational webinars in honor of National Health Education Week. Additionally, her research surrounding African Americans and sickle cell was presented at the 2018 and 2019 American Public Health Association (APHA) Annual Meetings and in 2018, she became the first African American to receive the APHA International Health Section's (Inaugural) Young Professional Award. As an alumna of the 16th U.S. Surgeon General's Community Health Leadership Program, Revelle has co-authored *Achieving Health Equity in the United States*, an in-depth policy statement adopted by the American Public Health Association. As a proud graduate of North Carolina, A&T State University, Revelle is the 2020 recipient of the prestigious Julia S. Brooks Achievement Award which honors her work, dedication, and service to the advancement of the university. Additionally, as a proud graduate of Morehouse School of Medicine, Revelle is a 2019 recipient of the Top10 Under 40 Alumni Award, which recognizes her achievements and commitment to the creation and advance of health equity.

Programs and Activities During *COVID-19* Pandemic in Review

COVID-19 OUTREACH EFFORTS

Community Health Coalition (CHC), a non-profit with the mission to reduce health disparities for over 30 years reached out to the Durham community during COVID 19 pandemic with a number of initiatives.

In partnership with several companies, organizations, and food suppliers, CHC delivered FREE catered food, facial masks, and preventive/educational materials and administered FREE site testing to combat the spread of COVID 19 to over 3000 community residents and church members. Thanks to the support of NC MedAssist, CHC also delivered family packs of Over-The-Counter medication along with some children specific packs.

CHC delivered over 3000 hot meals to essential workers and the community. Some neighborhoods were Lincoln Community, McDougal Terrace, Senior Housing communities including Morning Glory, Hosierey Mills and Morreene Road. Hot meals were also delivered to church communities including Refiners, Mt. Level, New Bethel, Kyles Temple, Gathering Common Unity, St. Joseph AME Church and

Porch Ministry Church communities. ↑

Information on how to prevent and/or stop the spread of this disease was distributed by CHC throughout the community via social media, constant contact, our Health Tip newsletters. The information stressed:

- Washing hands for 20 seconds
- Social distancing or remaining at least 6 feet away from people
- Abstaining from touching eyes, nose and mouth
- Staying home as much as possible

- **Wearing protective face covering**

- Cleaning and disinfecting house surfaces much as possible
- Covering coughs and sneezes
- Knowing the Symptoms (fever, dry cough, diarrhea, loss of taste or sense of smell, pink eye or sore throat, profuse night sweats, body aches and fatigue)
- Knowing where to call or go for help if you have trouble breathing, are confused, or having chest pains or pressure, bluish lips and/or face – Call NC COVID 19 hotline 886-467-3821 or Duke Health COVID 19 hotline 919-385-0429 or Durham County Health Department

Five (5) FREE COVID-19 Site Testing events, reaching over 800 community members were held. The site testing was done by Durham Academy of Medicine, Dentistry and Pharmacy in partnership with Community Health Coalition, Old North State Medical Society, Russell Pharmacy and Shoppe. Other services were provided by United Providers of Health.

COVID-19 Conversation in Our Community

Dates:
 July 7th, 2020 @ 10:30am
 &
 July 9th, 2020 @ 6:00pm

A Free COVID-19 Virtual Event:

Please join our panel informing the community about COVID-19. Learn about virus prevention, testing, and how to deal with stress during this pandemic.

Panelists:

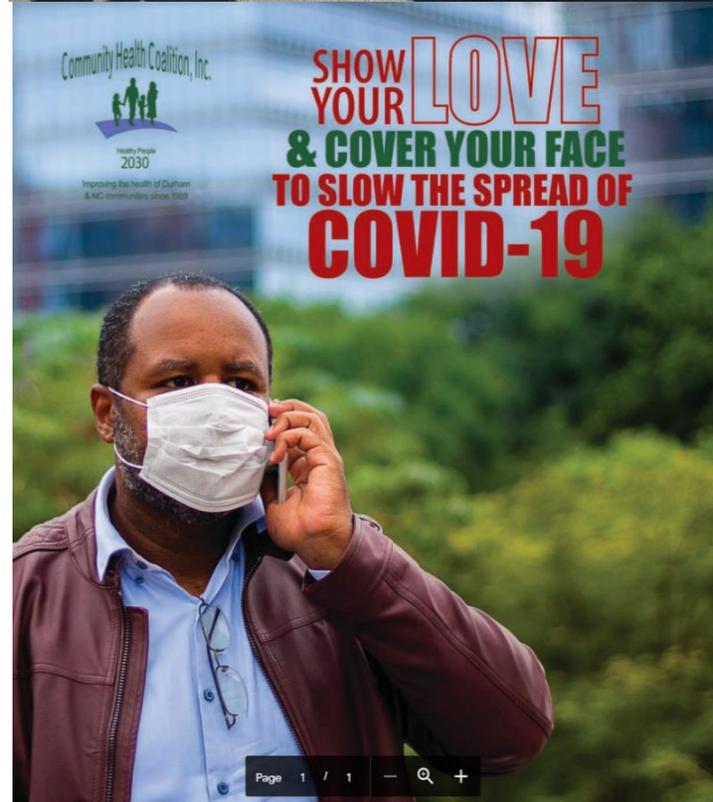

Elaine Hart-Brothers, MD, MPH
 Executive Director & Co-Founder
 "Community Health Coalition"

Wanda Boone, Founder
 "Together for Resilient Youth"

<https://www.eventbrite.com/e/covid19-conversation-in-our-community-tickets-111835298388>

In Partnership with Durham County Commissioners, CHC distributed over 20,000 masks and created and disseminated flyers to encourage the community to wear masks.

COVID-19 Initiatives were managed by CHC Personnel, Community Volunteers and Drs. from ONSMS, DAMDP and Russell's Pharmacy & Shoppe. The events were directed by Dr. Darius Russell, PharmD, managed by Victoria Revelle, MPH and coordinated by Nurse Vivian Jackson. Initiatives were funded in-part by Durham County Commissioners, NC MedAssist, The Palace International, End Hunger Durham, Southern Harvest, Durham Soup, BCBSNC and United Providers of Health.

HEALTH TIP NEWSLETTER – CHC’S SIGNATURE PROGRAM

Health Tips has been a signature program of Community Health Coalition for over 25 years. Education and information on health disparity topics are distributed to health & wellness ministries in more than 150 predominantly African American churches and more than 1700 subscribers via emails to health organizations, individuals and community groups in Durham County and surrounding areas each month. Health tips are written by Community Health Coalition in collaboration with a group of African American doctors of medicine, dentistry, pharmacy and philosophy.

Objective: To encourage communities to read and churches to share health information with congregations from the pulpit on the 4th Sunday of each month, and to place health tips in church programs, on bulletin boards and on their websites.

Outcome: On the 4th Sunday of each month, through health & wellness and other ministries in Durham County and surrounding area churches, CHC reached more than 30,000 people with information on the following health topics: prostate and breast cancer detection and prevention, mental health, high blood pressure, heart health awareness, exercise, diet, dental care, nutrition, health disparities, diabetes, organ donation, and maternal and child health. All newsletters emphasized how COVID-19 adversely affected all who had underlying health disparities. CHC also reached 17,000+ community members through its email marketing platform.

To view our health tips, go to CHC website or click on link below:

<https://www.chealthc.org/healthtips>

L to R: Drs. Avis Artis, Crystal Tyson, Mary Braithwaite, Rickey Baskett, Tedra Anderson-Brown, Julius Wilder

The project was managed by Carmelita Spicer, M.Ed and written in collaboration with a group of Black doctors of medicine, dentistry, pharmacy and philosophy. It was edited, posted and maintained on Facebook by Carmelita Spicer and on CHC’s website. Initiative was financed with general operating funds.

COMMUNITY EMPOWERMENT PROGRAM - TELEHEALTH INITIATIVE

The Community Empowerment Program (CEP) is a signature program of Community Health Coalition, Inc. For more than 20 years, the Community Empowerment Program has provided free health screenings, health education and referral resources to residents in the Morreene Road, Hosiery Mill and Morning Glory public housing communities monthly. The program has since expanded to local faith-based communities and other community-sponsored events.

The coronavirus (COVID-19) pandemic interrupted the normal method of service delivery. However, because of the Coalition's commitment to the overall health and well-being of the community, new ways to address the social determinants of health were strategically designed and implemented. In-person interactions were replaced with virtual telehealth services, along with the mass distribution of face coverings and fresh food/produce. To further ensure those most affected had basic fresh fruits and vegetables, the Coalition partnered with NC MedAssist and Ford Produce. Through this partnership, the Community Health Coalition was able to provide over \$90 worth of over-the-counter medicine, safety items so individuals could stock their medicine cabinet and a produce box, which contained fresh seasonal produce. Through this partnership, individuals also had the opportunity to apply for a one-year supply of prescription medicine that is delivered to their home.

Outcomes:

The Community Empowerment Program (CEP) is designed to capture information related to general health status and behavior using a survey tool that asks a series of questions to assess residents' ability to manage, communicate about, and modify his/her health. The survey was administered at the end of the program to increase our understanding of the future needs of the

Dr. Delon Canterbury, PharmD
Director, Telehealth Initiative

Vivian Jackson
Project Coordinator

COMMUNITY EMPOWERMENT PROGRAM - TELEHEALTH INITIATIVE, continued.....

residents and health education and promotion activities that will be most beneficial to residents in the new program year.

At each event, (prior to COVID-19) 22 participants were surveyed and asked to assess if his/her ability to manage health medical issues improved, if his/her ability to communicate with practicing clinicians has been enhanced because of the educational activities, and if he/she plans to modify habits. Forty nine percent (49%) of the respondents strongly agreed that the ability to manage health medical issues has improved. Forty percent agreed, eight percent disagreed, and three percent neither agreed nor disagreed that the ability to manage health medical issues has improved. Being able to communicate with your clinicians is important to overall health and wellbeing and as a result of the educational activities, 47% strongly agreed that their ability to communicate has been enhanced. Forty two percent agreed, nine percent neither agreed nor disagreed, and two percent disagreed that communicating with clinicians has been enhanced. Finally, as a result of participating in this program, fifty two percent (52%) of the participants strongly agreed to modify health behaviors/habits, while forty one percent (41%) agreed, and eight percent (8%) neither agreed nor disagreed to modify habits.

Initiative was managed by Dr. Canterbury, PharmD and Vivian Jackson. Funding was provided by Durham County Health Department and BCBSNC.

ABC SUBSTANCE ABUSE PROGRAM - THE ABC'S TO HEALTHY LIVING FROM THE YOUTH'S POINT-OF-VIEW.

The 8-week program titled, *The ABC's to Healthy Living from the Youth's Point-of-View- A Photo Voice Project* was designed for the prevention of use and abuse of alcohol, E-Cigarettes (VAPES) and other potentially harmful substances among young people 12 to 18 years of age.

The objectives were to increase awareness, address prevention and promote intervention of use of alcohol, e-Cigarettes (VAPES) and other potentially harmful substances.

Strategy: The program curriculum was designed to introduce the subject of abuse and use of harmful substances, stimulate conversation, and administer pre- and post-surveys, CRAFT and Rosenberg. The youth were given a pre- and post-survey to measure their levels of awareness and possible willingness to sustain from use in the future. There were key speakers: Mental Health Counselors, MDs, and Professionals from Durham County Department of Public Health and NAATPN (National AA Tobacco Prevention Network & Alliance Health Plan)

The Dates:

Jan. 21st, 28th

Feb. 4th, 11th, 18th & 25th

March 3rd & 10th

The Location &Time:

Every Tuesday from
4:15 to 6:00pm on
NCCU Campus

Outcomes:

From the Pre-Post Surveys:

CRAFT screening tool was used to measure and evaluate the youths' awareness and power of oneself. We anticipated that 65-70% of youth participating would become more aware, become more empowered and have a positive attitudinal change that would deter self-destructive behavior and relationships that lead to alcohol or drug use.

Our objectives were met: Well over 65% of the participants attending the sessions responded "no" to drinking more than a few sips of alcohol and responded "no" to smoking marijuana or hashish and "no" to smoking any illegal drug, over the counter or prescription drug. Seventy (70%) of the participants said that they had not ridden in a car driven by someone who was high or had been using alcohol or drugs.

Rosenberg is a self-esteem measure. The scale measures global self-worth by measuring both positive and negative feelings about the self. In both the pre- and post-surveys, 47-52% of the youth felt that they were of strong worth and were satisfied with themselves. In the pretest we

ABC SUBSTANCE ABUSE PROGRAM continued....

saw that 56% of the youth wish that they could have more respect for themselves. Good News! In the post test, we saw a 10% increase in 1) the number of youths who now respected themselves and 2) the number of youths that now had much of which to be proud.

From the Evaluation:

Empowerment & Ambassadorship were realized. Sixty-seven (67%) said that they learned something new about vaping, e-cigarettes and alcohol. Ninety-one (91%) felt that vaping and alcohol use could be harmful to their health. 95% said that they would recommend the program to a friend and other students. 100% said if they were asked to experiment with marijuana, hallucinogenic drugs, ecstasy, heroin and or methamphetamines they would say no. If asked by friends or a group of students to experiment with e-cigarettes or vape, 100% said no. However, when asked the same question about experimenting with alcohol, 90.4% of the youth said that they would say no. We still have work to do!

From Conversation at the End of the Program:

All said that they would not knowingly ride with anyone who had been drinking. One young man, age 17, stood before the group at the final celebration and told them that he had been heavily vaping, but with the sessions and lately realizing shortness of breath when running, he had stopped and was not afraid to tell his friends that vaping was harmful! We all applauded him. "That took guts"! – to stand before his peers, his mother and others and confess.

Below are photos from the youth. They identified and captured products and barriers to optimal health and illuminated situations in their surrounding that have been ignored.

Healthy Living Through the Youth's Point-of-View Program was funded by the Durham County Alcoholic Beverage Control Board and managed by Carmelita Spicer, M.Ed.

SHOP TALK- A Virtual Conversation with Beauticians about Hypertension

SHOP TALK

ATTENTION: NC Beauticians/Stylists

The purpose of “Shop Talk” was to reduce the mortality rate of heart disease and stroke by engaging women in lifestyle and disease management through health promotion and education.

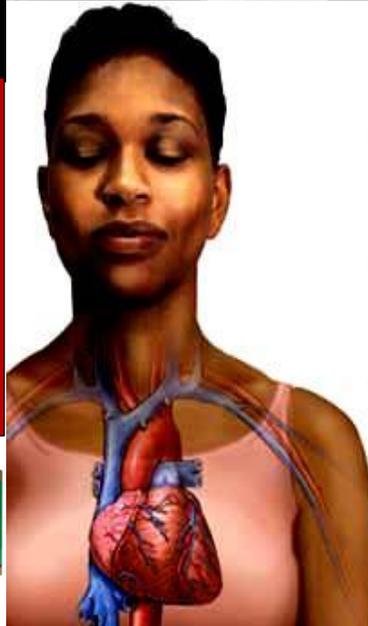

DATE AND TIME

Monday

September 28, 2020

11:00 am – 3:00pm

Black Women:

- Are more at-risk for heart disease than any major ethnic group in US
- Have higher incidence of diabetes and hypertension
- Are underrepresented in major research trials
- Are up to 60% less likely to receive aggressive diagnostic testing

Interactive dialog with health care professionals!

Gift Cards were given to the 1st 25 Participants!

Healthy People
2030

Improving the health of Durham & NC communities since 1989

www.chealthc.org

919-470-8680

SHOP TALK- continued....

Objectives:

- To utilize Paulo Freire’s model of Empower Education to develop and implement a virtual workshop to increase knowledge and awareness of heart disease, stroke, medication management and relative areas of women’s health.
- To bring innovation technology to the intervention.
- To capture qualitative data from African American beauticians, instructors, and cosmetology students via pre- and post-virtual surveys.

Strategy: CHC implemented a Beautician “**Shop Talk**” on September 28th, 2020 targeting (prioritizing) beauticians across the state of North Carolina with an emphasis on beauty schools. CHC focused on determining beauty shops that are in areas that have been noted as having a high incidence of unmanaged and uncontrolled hypertension such as Durham, Onslow, Duplin, Wake, Person and Guilford counties. Through this selective process, beauticians and cosmetology students were recruited and invited to attend a virtual half day training and focus group. This training included speakers, a Cardiologist, Primary Care Physician, OB/GYN, Heart Transplant Survivor, and a Pharmacist, who addressed various areas of cardiovascular health.

Outcomes: Based on the post-workshop survey, all in attendance had a better understanding of hypertension after attending the workshop and felt that the information that they learned would help them better implement lifestyle changes to lower their cardiovascular health. Additionally, the secondary objective (to capture qualitative data from African American beauticians, instructors, and cosmetology students from key counties in North Carolina, on effective ways to reach and teach women about healthy lifestyles, early detection and to navigate them to low-cost screenings) was met. Due to the quantity of participants, the sample size was small, but many ideas were formulated through that group. More qualitative data could be achieved with a greater quantitative number of participants. Last, the third and final objective to bring innovation and technology to the intervention was met and exceeded. CHC was able to effectively execute a virtual workshop with key players in the healthcare industry and influential individuals in the Durham Community to help educate and empower African American Beauticians and Cosmetology Students in the areas of hypertension, stroke, and health management. The areas of growth for this event would be to increase the number of participants and effectively attract Cosmetology Instructors.

Initiative was funded by NCDHHS. It was directed by Darius Russell, PharmD and managed by Victoria Revelle, MPH with support from Vivian Jackson, Michael Stephens-Davis, Intern, McKenzie Joseph, Intern and Carmelita Spicer, M.Ed.

MATERNAL & CHILD HEALTH VIRTUAL SERIES

TUESDAY, DECEMBER 22, 2020
9:30 AM – 11:30 AM

MATERNAL AND CHILD HEALTH VIRTUAL INFORMATIONAL SYMPOSIUM

According to the 2020 U.S. Surgeon General's *Call to Action to Improve Maternal Health*, "Black women die from pregnancy-related causes at 2-3 times the rate of their White counterparts." If you are interested in learning more and working towards eliminating this disparity,

please join us virtually on December 22, 2020 from 9:30 AM – 11:30 AM.

Dr. Avis Artis (OBGYN) (pictured to the right) will be the speaker for the symposium.

<https://www.chealthc.org>

Background:

Due to structural racism and a myriad of additional factors, African American women face glaring disparities in the United States regarding maternal and child health. To assist in decreasing these disparities and increasing health equity, Community Health Coalition, Inc. took action and implemented a Maternal and Child Health Virtual Symposium (MCHVS) Series.

Objectives:

- To create awareness
- To educate and inform
- To encourage dialogue

Strategies:

In preparation for this initiative (in December of 2020) flyers were produced and disseminated to a listserv of approximately 1700 consumers (throughout Durham and surrounding areas) from various backgrounds. This included, but was not limited to religious organizations, a medical, dental and pharmacy organization, civic organizations, non-profit organizations throughout the Triangle Area and various individuals who have signed up over the years to receive health education from the Community Health Coalition, Inc. The MCHVS was designed as an educational experience. This symposium implemented pre-tests, a maternal and child health disparity lecture from a retired physician, consultation studios, post-tests and a feedback session.

Outcome:

On Tuesday, December 22, 2020 at 9:30am, Community Health Coalition, Inc. hosted its first MCHVS which was geared toward women of childbearing age (18-51). Approximately 14 women were in attendance representing Durham, Wake, Person, and Granville counties. Additionally, one participant in attendance joined the symposium from Texas. Dr. Avis Artis (retired OBGYN) was the guest speaker during the symposium. She lectured on pregnancy, disparities and health across the lifespan. During the consultation studios participants developed solution-oriented strategies and expressed what they would like to see in future a MCHVS. Indeed, the MCHVS was a true success.

This initiative was directed by Dr. Darius Russell, PharmD, RPh, managed by Victoria Revelle, MPH with support from Vivian Jackson, Sean King and Carmelita Spicer, M.Ed. The MCH Initiative is funded through a grant from the United Providers of Health.

Recognition of Governor's Appointment

In August 2020, Dr Christy Clayton MD, CHC's Board President was appointed by Gov. Roy Cooper to the Andrea Harris Task Force and placed on the healthcare subcommittee. Established under [Executive Order No. 143](#), the Andrea Harris Social, Economic, Environmental, and Health Equity Task Force addresses the social, environmental, economic, and health disparities in communities of color disproportionately impacted by COVID-19. The Task Force is named in honor of the late civil rights activist, Andrea Harris, who dedicated her life to eliminating disparities in North Carolina.

Recipient of CHC Marion G. Miles Volunteerism Award

Nurse Mary Baldwin, RN, BSN, MPH was presented the 2020 CHC annual award for exemplifying the volunteerism spirit of Nurse Miles who had worked with CHC for 20+ years before retiring. Nurse Baldwin oversaw the outreach activities of all the nurses at CHC for several years. **She worked not out of obligation or financial reward, but out of true desire and commitment to the cause.** Nurse Baldwin accepted the award graciously with thanksgiving and expressed that Nurse Marion G. Miles had been her mentor.
